# Lars Lindberg Christensen

Lars is an award-winning astronomer and science communicator. He has authored a dozen popular science books translated into more than ten languages. Lars has directed several documentaries and planetarium movies that have received critical acclaim around the world. He is responsible for the communication from some of the world's largest and most famous telescopes for ESO and ESA such as the Hubble Space Telescope, the Extremely Large Telescope, the Very Large Telescope, ALMA and La Silla. He has produced for a multitude of different media from planetarium shows, laser shows, to web, social media, print, TV and radio. Lars has more than 200 publications to his credit, most of them in popular science communication and its theory. He is Press Officer for the IAU, a founding member and former President of the IAU Commission 55/C2 Communicating Astronomy with the Public (http://www.communicatingastronomy.org). In 2005 Lars received the Tycho Brahe Medal for his achievements in science communication and has been credited with leading the most successful outreach efforts in ESO's history.
